Change of Address Notices

Practitioners are reminded of their duty under 37 CFR 10.11(a) to notify the Office of Enrollment and Discipline of any change of business address. Any such change must be in a notice separate and apart from any notice of change of address in individual patent applications. Even though your Data Sheet on file in the Office of Enrollment and Discipline may include your home address, all correspondence by the Office of Enrollment and Discipline with attorneys and agents registered to practice before the Patent and Trademark Office in patent cases will be sent only to the *business address* as reported on the Data Sheet. Failure to maintain a current business address with the Office of Enrollment and Discipline could result in removal from the register under 37 CFR 10.11(b) if a letter addressed to the last reported business address on file in the Office of Enrollment and Discipline is returned by the U.S. Postal Service as being undeliverable or is returned with a notation "Return to Sender". The policy regarding reinstatement is set forth in 1064 OG 12 and 1064 TMOG 21.

IMPROVEMENTS TO SERVICES

- *Special Orders for Copies of Trademarks* — Special orders for copies of patents and trademarks may now be placed for any patent or trademark issued. Such orders, which must be placed at the Office's Public Service Window in the Patent Search Room, will be filled within one workday.

  Until June 1986, members of the public were able to place special orders for copies of only the most recent 18 months of patents and trademarks. In June, this service was expanded to include all patents issued. On Dec. 22, 1987, the service was expanded further to include all trademarks issued.

  The Office requires that two coupons be submitted for each special order. There may be occasions when the request for a special can not be filled within one workday. In such cases, the Office will refund one coupon to the customer and the order will be filled within five days.

- *Faster Availability of Patent Assignments for Searching* — We have increased the frequency of updating the automated patent assignment system from every six months to monthly. Members of the public using this system in the Assignment Search Room will now be able to search assignments filed approximately one month after receipt in the Office.

- *Date of Recordation for Patent Assignments* — During a recent law office visit, we became aware of some public confusion relating to the source of the recording date on the Notice of Assignment Recordation. The date is the actual date of entry into the mailroom, NOT the date the document was given a reel and frame number. We are redesigning the notice to eliminate the confusion.

- *Patent Search Room Copying Services* — For convenience of the users of the Patent Search Room there will be one photocopier dedicated for 8½" x 11" paper. The machine is located in the North Stacks of the Patent Search Room near the Cashier's Cage. Previously, all copiers were supplied with legal size paper only and users who desired smaller size paper had to cut their copies.

HELPFUL HINTS

- *Avoiding Delays in Assignments for New Patent Applications* — The automated patent assignment system is dependent upon bibliographic information that is keyboarded to produce filing receipts and to create records in the PALM system. When assignments are filed before the filing receipt has been produced, their processing is delayed until the bibliographic information is keyed and verified. To avoid delays in processing of assignments, applicants should wait to file assignment documents for new patent applications until the filing receipt is produced.

- *Withdrawal of Attorney* — To expedite the handling of requests for permission to withdraw as attorney under 37 CFR §1.36, submit the request in triplicate (original and two copies) and indicate thereon the present mailing addresses of the attorney who is withdrawing and of the applicant. The examining group number should also appear on all such requests. Because the Office does not recognize law firms, each attorney of record must sign the notice of withdrawal, or the notice of withdrawal must contain a clear indication of one attorney signing on behalf of another.

  A request to withdraw is effective when approved rather than when received. This is particularly important when such requests are submitted toward the end of the period for response. There should be at least thirty days between approval of withdrawal and the expiration date of a time response period so that the applicant will have sufficient time to obtain other representation or take other action. If less than thirty days remains in a running response period, a request to withdraw is normally disapproved.

  If a period has been set for response and the period may be extended (without a showing of cause pursuant to 37 CFR 1.136(a)) by filing a petition for extension of time and fee, the practitioner will not be required to seek such extension of time for withdrawal to be approved. In such a situation, however, withdrawal will not be approved unless at least thirty days would remain between the date of approval and the last date on which a petition for extension of time and fee could properly be filed.

THERESA A. BRELSFORD,
Assistant Commissioner
for Administration.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
